Category:Windows programs Category:Windows-only softwareQ: How to update value of KendoUI DatePicker in Angular 6 How to update the value of kendoDatePicker in angular6 I tried like this But its not showing any update I have tried this as well ngOnInit() { var self = this; self.selectedDate = ko.observable(); self.endDate = ko.observable(); self.selectedDate.subscribe(function() { self.endDate(self.selectedDate()); }) self.endDate(); } A: please try this: Q: Reduction from "Counting the Size of a Gapped Sequence" The recurrence relation for counting the size of a gapped sequence: $$s(n+1)=s(n) + k+l+M^n+M^{k+l}$$ Where n is the position, k is the gapped character at

position n, and l is the amount of the gap between the left side of the gapped sequence and the following character, $l=n-k$ for a gap, and $l=n-2$ for an underscore or a hyphen in the sequence. This is the reduction: $$s(n+1) = \begin{cases} s(n) + k+l, & k+l \leq n \\ s(n) + k+2(n-k), & k+l > n \end{cases}$$ d4474df7b8
